PROFESSIONAL SUMMARY

Computer Science Engineering graduate specializing in Artificial Intelligence, Machine Learning, NLP, and Generative AI. Experienced in building end-to-end AI applications using Python, Flask, React, LLMs, RAG, and Computer Vision. Passionate about developing intelligent systems that solve real-world engineering and business problems.

EXPERIENCE

AI/ML for Data Science Intern | Vision Astraa EV Academy

Bangalore, Karnataka

Feb 2026 – May 2026

- Applied Machine Learning and Data Science techniques on real-world EV telemetry datasets during a 3-month industry internship, supporting predictive analytics and intelligent EV diagnostics.
- Performed exploratory data analysis (EDA), data preprocessing, data cleaning, data wrangling, and feature engineering on structured EV telemetry data using Python, Pandas, and NumPy.
- Built and evaluated predictive models (regression, classification) using Scikit-learn; applied model training, model evaluation, and hyperparameter tuning to improve prediction accuracy.
- Created data visualization reports and dashboards using Power BI and Matplotlib, and contributed to ETL and data pipeline workflows for automated ingestion, producing KPI reporting and business intelligence summaries for EV analytics stakeholders.

TECHNICAL SKILLS

Programming Languages:

Python, SQL, HTML, CSS, JavaScript

Artificial Intelligence:

Machine Learning, Deep Learning, Generative AI, Large Language Models (LLMs), Computer Vision, Natural Language Processing (NLP), Retrieval-Augmented Generation (RAG), Prompt Engineering, Multimodal AI, Vision-Language Models (VLMs), Agentic AI

LLM Engineering:

Ollama, Phi-3, LLaVA, FAISS, Sentence-Transformers, Vector Embeddings, Semantic Retrieval, Context-Aware Retrieval, Conversational AI

Data Science & Analytics:

Exploratory Data Analysis (EDA), Data Preprocessing, Feature Engineering, Statistical Analysis, Predictive Modelling, Machine Learning, ETL, Data Visualization, Power BI

Frameworks & Libraries: Flask, React.js, FastAPI, REST APIs, Scikit-learn, Pandas, NumPy, OpenCV, Matplotlib, Seaborn, spaCy

Development & Tools: Git, GitHub, Jupyter Notebook, Google Colab, VS Code, Conda

KEY PROJECTS

EV AI Diagnostic Platform | AI Engineering Copilot [GitHub](#) Python, Flask, Ollama, Phi-3, LLaVA, FAISS, Sentence-Transformers, OpenCV

- Designed and developed an end-to-end Multimodal AI Diagnostic Platform integrating Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Computer Vision, and telemetry interpretation to provide intelligent EV diagnostics across battery, charging, range, thermal, and performance analysis.
- Built semantic retrieval pipelines using FAISS and Sentence Transformers to generate vector embeddings and enable context-aware retrieval from EV technical documentation.
- Integrated Phi-3 and LLaVA Vision-Language Models using Ollama to enable multimodal reasoning, image analysis, prompt engineering, and AI-assisted workflows for EV diagnostics.
- Designed modular AI workflows for battery diagnostics, telemetry interpretation, charging analysis, range prediction, and engineering calculations using reusable backend components.

AI Resume Screening & Ranking System [GitHub](#) Python, NLP, spaCy, Sentence Transformers, Scikit-Learn, Flask, TypeScript

- Developed a full-stack AI Resume Screening & Ranking System that automatically parses PDF, DOCX, and TXT resumes, extracts candidate information, and ranks applicants against a Job Description using semantic similarity.
- Built a modular NLP pipeline — Resume Parsing, Text Preprocessing, Feature Extraction, Sentence Transformer Embeddings, Cosine Similarity Engine, and Candidate Ranking — using spaCy and Sentence Transformers (all-MiniLM-L6-v2) for contextual matching beyond keyword-based ATS filtering.
- Designed a weighted candidate scoring framework (Skills 45%, Experience 25%, Education 15%, Projects 10%, Certifications 5%) and a Flask REST API powering a React + TypeScript recruiter dashboard for visualizing rankings and recommendations.
- Automated structured report generation, exporting ranked candidates into downloadable CSV and JSON files to reduce manual resume evaluation effort for recruiters.

EDUCATION

HKBK College of Engineering

Bangalore, Karnataka | 2022 – 2026

Bachelor of Engineering – Computer Science | Visvesvaraya Technological University (VTU)

Infant Jesus PU College

Raichur, Karnataka | 2019 – 2021

Pre-University Science (PCMB)

CERTIFICATIONS & TRAINING

Data Analytics Job Simulation — Deloitte Australia (via Forage) | July 2025 [Link](#)

- Completed practical tasks in Data Analysis, Statistical Analysis, Data Visualization, and Forensic Technology in a simulated Deloitte consulting environment, applying data storytelling and business intelligence skills to real-world scenarios.

AI/ML for Data Science Intern — Internship Completion — Vision Astraa EV Academy (VTU Affiliated) | Feb – May 2026 [Link](#)

- Certified completion of a hands-on AI/ML project covering machine learning, data science, predictive analytics, and EV telemetry analysis.

ADDITIONAL INFORMATION

Soft Skills: Communication, Team Collaboration, Adaptability, Problem-Solving, Critical Thinking, Self Learning

Languages: Kannada (Native), English (Professional), Telugu (Fluent), Hindi (Fluent)
